

SAP BUSINESSOBJECTS 4.2

DECEMBER 28, 2017 [KAUSTUBH SATPUTE](#) [LEAVE A COMMENT](#) [EDIT](#)

With the SAP BusinessObjects BI platform governing your data, the entire company shares a single version of the truth. Consider the full universe of BusinessObjects BI Solutions either on premise, in the cloud, or as a hybrid approach:

SAP BusinessObjects 4.2

The market leading analytics solution that organizations have long relied on to provide a comprehensive, integrated platform that helps unlock the real value in their data for smarter decision making, to stretch their competitive advantage, and to drive business transformation.

Cloud for BusinessObjects

SAP BusinessObjects Cloud allows instant insight to action on data from all sources, enabling decision making such that everyone can discover, visualize, plan and predict, all in one unified, cloud-based product that eliminates point solutions.

BusinessObjects Roambi

A key component of SAP BusinessObjects Cloud, Roambi, delivers amazing visualizations instantly on any mobile device so business users can intuitively understand and explore data and share information across the enterprise.

HANA Edge Edition

A bundled solution delivering SAP HANA Predictive Analysis Libraries, SAP HANA, dynamic tiering, and robust data integration to small and midsize enterprises.

Lumira

A game-changing UI that allows anyone in your organization to visualize and better understand data. Business users can get up to speed quickly and analyze large volumes of data, whether it's in spreadsheets or databases, to find insights that captivate audiences and inspire action in real time.

Here's a quick glance at some (but by no means all) of the new elements introduced in this release:

- SAP BusinessObjects Business Intelligence platform 4.2 includes:
 - Recycle Bin application in CMC
 - BI Commentary Service
 - Notification Alert Capabilities in BI Launch Pad
 - Push Notifications to iOS devices
 - Restful Web Services APIs for Publication, User and User Group Management, Scheduling, and BI Administrators' Cockpit
 - Upgrade Management Tool and Phase Wise Installation
- SAP BusinessObjects Web Intelligence 4.2 includes:
 - Sharing of Elements
 - Parallel Queries
 - Enabled BI Commentary Services
 - Geo Mapping and Visual Extensions
 - Direct Access to HANA views
 - SAP HANA Online Mode
- SAP Crystal Reports for Enterprise 4.2 includes:
 - Bar Code and QR Code Support
 - Waterfall Charts
 - Vertical Alignment of Text
