

SAP LANDSCAPE TRANSFORMATION

SEPTEMBER 9, 2015 ADMIN LEAVE A COMMENT EDIT

SAP Landscape Transformation (SAP LT) is the standard software to reflect IT and business-driven changes in SAP systems. It helps you to analyze, plan, and realize transformation projects within common business scenarios such as corporate mergers & acquisitions, divestitures, internal reorganizations, and projects to harmonize existing business processes. It enables the transition to new SAP innovations such as SAP Business Suite powered by HANA or SAP HANA Enterprise Cloud providing highly-standardized software with embedded knowledge.

Analyses

- Perform analyses for transformation
- Compare repository and customizing of systems

Leverage sell, buy, and restructure

- Sell or buy a company or parts of it
- Perform business unit reorganizations

Unify and transform data

- Gain transparency in financials and logistics
- Harmonize master data

Consolidate and reduce IT costs

- Consolidate systems with matching release or across releases
