

SAP S/4HANA: THE NEXT GENERATION BUSINESS SUITE

[SEPTEMBER 7, 2015](#) [ADMIN](#) [LEAVE A COMMENT](#) [EDIT](#)

A transformational platform that unleashes true business innovations across the enterprise.

SAP S/HANA is our next generation business suite. It is a new product fully built on the SAP HANA platform and designed with SAP Fiori user experience. SAP S/4HANA delivers massive simplifications and innovations to help reinvent businesses. Business leaders will now be able to truly unleash innovations across the entire enterprise and proactively re-imagine and shape their company's future.

SAP S/4HANA is the new default for any SAP Business Suite deal, but customers can use the innovations once they are ready for them just by following simple migration steps. All Innovations will be made available quarter by quarter and will gradually expand to more and more suite functions.

Choices for Your Customers

For new customers SAP S/4HANA is the clear choice for a perfect and connected enterprise with a future-proof platform to adopt SAP innovations.

Simplifications include new:

- Technology
- Data Management
- User Experience
- Multiple Deployment Options
